

Purvanshu Jindal

Full-Stack Developer | Software Engineer Intern
purvanshujindal10@gmail.com | +91 9313940136 | LinkedIn | GitHub

Education

- Maharaja Agrasen Institute of Technology (MAIT)** Delhi
Bachelor of Technology in Information Technology; CGPA: 8.86 Sept 2023 – Present
- S.D. Public School (CBSE)** Delhi
Class XII; 94% 2023
- S.D. Public School (CBSE)** Delhi
Class X; 96% 2021

Technical Skills

- Languages:** Java, JavaScript, TypeScript, SQL
- Frontend:** React, Next.js, HTML, CSS, Tailwind CSS
- Backend:** Node.js, Express.js
- Database:** MongoDB, MySQL
- AI & Automation:** LLM Integration, Prompt Engineering, Groq LLaMA 3.1, Whisper v3, n8n
- Tools:** Git, GitHub, VS Code

Experience

- Full Stack Web Development Intern - Unified Mentor** Jun 2025 – Aug 2025
 - Built and deployed 3+ full-stack MERN applications using modular backend architecture and RESTful API design.
 - Integrated JWT-based authentication and role-based access control supporting multiple user roles, improving API response efficiency by 20%.
- AI Intern — Mirai School of Technology** Jul 2025 – Aug 2025
 - Built an AI-powered itinerary generation system integrating 5+ external APIs for dynamic recommendation workflows.
 - Orchestrated multi-step workflow pipelines reducing manual processing time by approximately 30%.

Projects

- Mocklytics – AI Mock Interview Platform** Live Demo | GitHub
 - Built a resume-aware AI interview simulation platform using Groq LLaMA 3.1 for personalized question generation and Whisper v3 speech recognition.
 - Implemented an intelligent evaluation pipeline producing recruiter-style performance analytics including technical depth scoring and communication clarity assessment.
 - Architected a timed end-to-end interview workflow with asynchronous session lifecycle control and deployed using Next.js, React, Tailwind CSS, and Vercel.
- WeCode – Real-Time Collaborative Coding Platform** Live Demo | GitHub
 - Developed a real-time collaborative coding platform supporting 10+ concurrent users using WebSocket synchronization architecture.
 - Architected a room-based collaboration system with presence tracking, integrated chat, and synchronized whiteboard state management.
 - Integrated multi-language execution via Judge0 CE API processing 100+ executions while reducing latency by 25%.
- FitLife – Gym Management System** Live Demo | GitHub
 - Developed a full-stack MERN application implementing role-based dashboards supporting multiple workflows with secure access control.
 - Integrated authentication, workout tracking modules, notification services, and PDF invoice generation managing 50+ activity records.
 - Built responsive frontend using React and Tailwind CSS connected through RESTful APIs.

Problem Solving

- Solved 300+ Data Structures and Algorithms problems across arrays, recursion, trees, graphs, binary search, BFS, DFS, and dynamic programming.
- Practiced structured algorithmic problem solving using the Striver A2Z roadmap.

Certifications

- IBM SkillsBuild (2025) — From Learner to Builder: AI Agent Architect
- IBM (2025) — Computer Networking Basics
